

## Engineered for Quality Designed for Living

*Beautifully crafted Railings from Betterliving!*

In addition to looking lovely on your home, you have the comfort of knowing our railings have passed the structural tests necessary to **meet all national building codes!**

Classic styling, maintenance-free finish and structural strength!

Heavy aluminum posts make this system secure and its unique crossover design allows the handrails to run continuously over the posts. This makes our railing straighter, stronger and with fewer joints than other systems.

Aluminum exceeds other common railing materials such as wrought iron (*which can rust*), wood (*which can decay or splinter*) or vinyl and composites (*which have no structural properties and will degrade over time*). Only aluminum is used - no plastic - even for the small parts to assure strength and durability throughout the entire railing system. Truly customize your railings . . . choose from a variety of posts, pickets, glass panels and maintenance-free frame colors to beautifully compliment your home.

**FEATURES AND OPTIONS**

**PICKETS, POSTS, CROSS-OVER POSTS**

Maintenance-free Aluminum in a variety of sizes to custom design your railing

**TEMPERED GLASS PANELS:**

Clear, Tinted or Frosted

**FLOOR BRACKETS**

Exclusive die-cast aluminum floor bracket covers hide all unsightly bolts and hardware for a clean finished look

**HANDRAILS:**

Unique design and gentle curves designed into the handrail allows it to run continuously across the posts and make it comfortable to the touch

**CAPS**

Specially designed caps provide a smooth, clean appearance while concealing fasteners from view

**PICKET SPACERS**

Snap-in spacers eliminate unsightly gaps between the pickets, while providing a solid look and feel. Our unique system eliminates unsightly screws, protruding splices or bulky couplings typical of do-it-yourself projects, because our railings are custom fit to your requirements.

**FINISH**

Polyester Powder Coatings and Duracon® Thermosetting Acrylic Enamel finishes assure a long lasting, trouble-free finish that is surface-impact, corrosion and scratch resistant

**LIGHTING (option)**

Low voltage halogen lights built right in

**SAFETY**

Betterliving railings also provide an unparalleled level of safety. Pickets are locked in with fasteners and spacer blocks and are captured in the bottom and top rail. Meets IRC and IBC codes and engineering requirements for residential and commercial use.

**WARRANTY**

Manufacturer's Warranty backed by Craft-Bilt, an industry leader since 1946

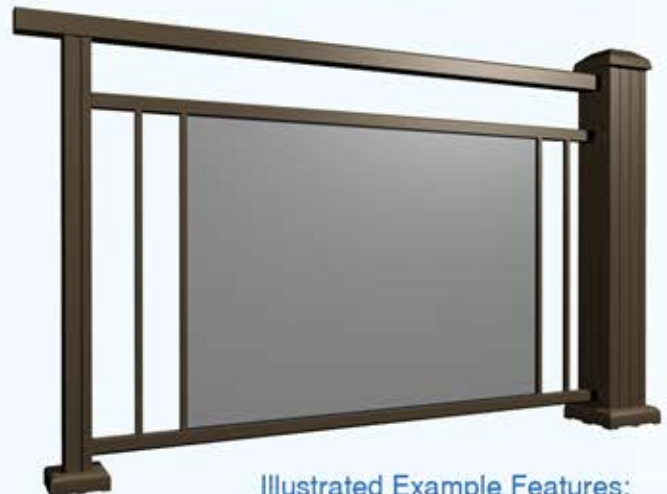

**BETTERLIVING structural aluminum & glass panel railing**

On-site fabrication and versatile non-welded design gives you a perfect custom fit for your deck, stairs, patio or balcony. Aluminum railing is impervious to the sun and any kind of weather! And the durable baked-on finishes eliminate the hassle of painting and staining.
