

## EXTERIOR SOLAR SHADES

Protect your home or sunroom from the sun with Betterliving's motorized exterior solar shades that help you control the sun from the outside, providing privacy and shade.

The most efficient way to block the heat of the sun is from the outside - before it has a chance to heat the window glass! Solar shades can block the sun's heat while still providing visibility to the outside. They pay for themselves year after year in reduced energy costs and protect your furnishings from harmful UV rays that may cause fading. The perfect solution for your sunroom to block heat and for added privacy. Fabric available in a variety of colors, weaves and styles.

Solar Shades blocking the heat of the sun from entering the home

Solar Shades on a Betterliving Sunroom

Shades operated together or independent - you decide!

Block the sun . . . but not the view!

- Shades can be made from solid acrylic exterior awning fabric, or PVC coated polyester or fiberglass screen. Polyester and fiberglass screen is available in 5% to 40% openness to control how much light you want to enter your home!
  - Motorized options for joined units include shared operators which control all joined shades with one push of a button, or separate operators to give you flexibility to adjust each shade independently
- Exterior shades glide along stainless steel cables, rods, heavy duty tracks or our "Zipper" system completely enclosing the shade
